

Hot Drop Jackpots – How to Play and Win Guide

There are many reasons to play slots - they're exciting and filled with unique features and special bonuses to get the heart rate beating. The chance of winning a big jackpot in reality though is quite low, this is a reason why many players shy away from progressive slot games as it could be weeks or even months before a big prize goes off.

But this is not the case with hot drop games as these are amount based and must pay-out before reaching a level of \$250,00 and they have time-based pays like hourly and daily drops. You always know when a game is possibly about to pay-out or possibly not to pay-out. This gives you a little edge as you know when to play or not to play the games. Unlike regular progressives you just really never know when a jackpot will drop so you are just topping up the pools.

These games are so easy to play, the Hot Drop Jackpots wheel is triggered when 3 jackpot symbols appear anywhere on the reels. This then activates the wheel feature. You spin the wheel and the pointer stops on one of the sections like in the image below. You are guaranteed a jackpot prize in the wheel feature be it say example \$1000 average in the hourly, \$25,000 average in the daily or a huge pay-out of up to \$250,00 average in the super jackpot.

Hot Drop wins are triggered randomly. You cannot win the jackpot from any bonus feature like in the free spins. The chances of winning a pay-out increases as the prize pool size increases for each different jackpot. Only just one spin by a player can win the big prize. When another player wins the drop a notification will be shown in the side widget. Once it's won, the relevant amount will be transferred directly to the player's credits balance.

Play when prizes are Close to their Limits of Paying

As alluded to before, the prizes are limit based. One is an amount based while two are time-based. To maximize the chances of winning any of these prizes, it's recommended to play when the jackpots are edging closer to their displayed limits. Personally, I only play when the games are near to their limits and yes there are more players who are doing the same thing as me that's for sure.

Spin the Reels When All Jackpots are Active

When it comes to the time-based drops, they are locked each time they are won. They only unlock once the next run time starts. This in essence means if a lucky punter wins the hourly prize at the 45-minute mark, it locks for the next 15 minutes and restarts at the hour mark. To maximise one's chances of winning, it's recommended for players to spin the reels when all prizes are active.
